

TO WHOM IT MAY CONCERN

SLTC.385/MD/2011

23rd June 2011

RECOMMENDATION LETTER

This is to certify that Teltac Worldwide has designed, procured and installed the international gateway for the country of Sierra Leone. Teltac Worldwide has been managing the international Gateway since 2007 on behalf of Sierratel (Sierra Leone Telecommunications Company). During this period, Teltac Worldwide has been performing according to ITU standard with excellent service rendering, applying internationally adopted KPIs, including zero down time which effectively led to an increase in traffic terminated in the country and a reduction in the price of outbound calls.
